

# PipeMat

## Subsea support mat, Technical Data Sheet

**PipeMat** is a mat made of High Density Polyethylene pipes. The mat can be used as subsea support, landing and positioning device or seabed/ pipeline/cable protection for lighter loads. The **PipeMat** is free from sharp edges and rigid parts and is therefore a very safe alternative to similar installation and protection products.

**PipeMat** can easily be rolled up for transport and storage.

Expected dimensions and characteristics for **PipeMat**:

Type	Dimension (mm)	Mass in air/seawater (Kg)	Bundle size
<b>PipeMat 16</b>	4000X4000X50	323/55	4000X800X300

The dimension above is our standard mat.

Custom design is possible upon client's request.
