

PREMIER CREWSAVER LIFEJACKET

SOLAS INHERENTLY BUOYANT

Since its introduction in July 2010, the Crewsaver Premier lifejacket has lead the way in passenger and crew lifejacket safety. The first lifejacket to be approved to ISO 200(80), the Premier has since gone on to be the choice of both the largest Cruise ships and some of the most discerning superyachts and commercial vessels worldwide.

With a design brief that stipulated ease and intuitive donning, mirroring the hugely successful original Premier (over 750,000 units sold), the Premier uses a patented “Reverse Angle Head Support” to achieve the vital in-water performance that the regulations require.

The unique design of the neck opening allows for increased wearer comfort, while durability is assured by the use of tried and tested quality components.

Key Features

- MED/SOLAS approved lights
- Removable hygiene cover
- Spray hood
- Donning instructions

PREMIER
